

An aerial photograph of a modern, minimalist wooden house built on a rugged, rocky island. The house features large glass windows and a dark roof. A wooden deck and stairs lead from the house down to a long wooden dock extending into the water. A small white boat is moored at the dock. The surrounding landscape is a mix of dark, forested hills and light-colored, rocky terrain. The water is calm with some ripples. The overall aesthetic is clean and modern, blending with the natural environment.
